

BETHLEN GÁBOR
HUNGARIAN LANGUAGE SCHOOL

I decided to study Hungarian so that I may learn more about my ethnic background, be able to speak with family and friends, talk with local people in Hungary when I travel there, and gain a better cultural understanding of this great nation.

I recommend this course to anyone who wishes to learn more about the language, culture and customs of this wonderful country. The course highlights new and builds on previously learned material to ensure comprehension and understanding of day-to-day conversation. It ensures the student has a strong foundation before continuing or advancing too quickly.

As when learning any new language, the student must put to use as much of the language as possible on a regular basis. Daily practice however simple, is imperative. I review class notes on a regular basis in addition to immersing myself with online content and streaming media direct from Hungary to ensure regular reinforcement of the speed and sounds of the language outside of the classroom from a native speaker.

The course has teaches many cultural aspects (some of which one may only obtain from learning, understanding and speaking the language). The course has teaches local customs and traditions one would observe in current-day Hungary. I have gained a good understanding in basic conversational Hungarian without the dry grammar studying that is found in most other language course. It's an excellent course taught by an excellent instructor.
